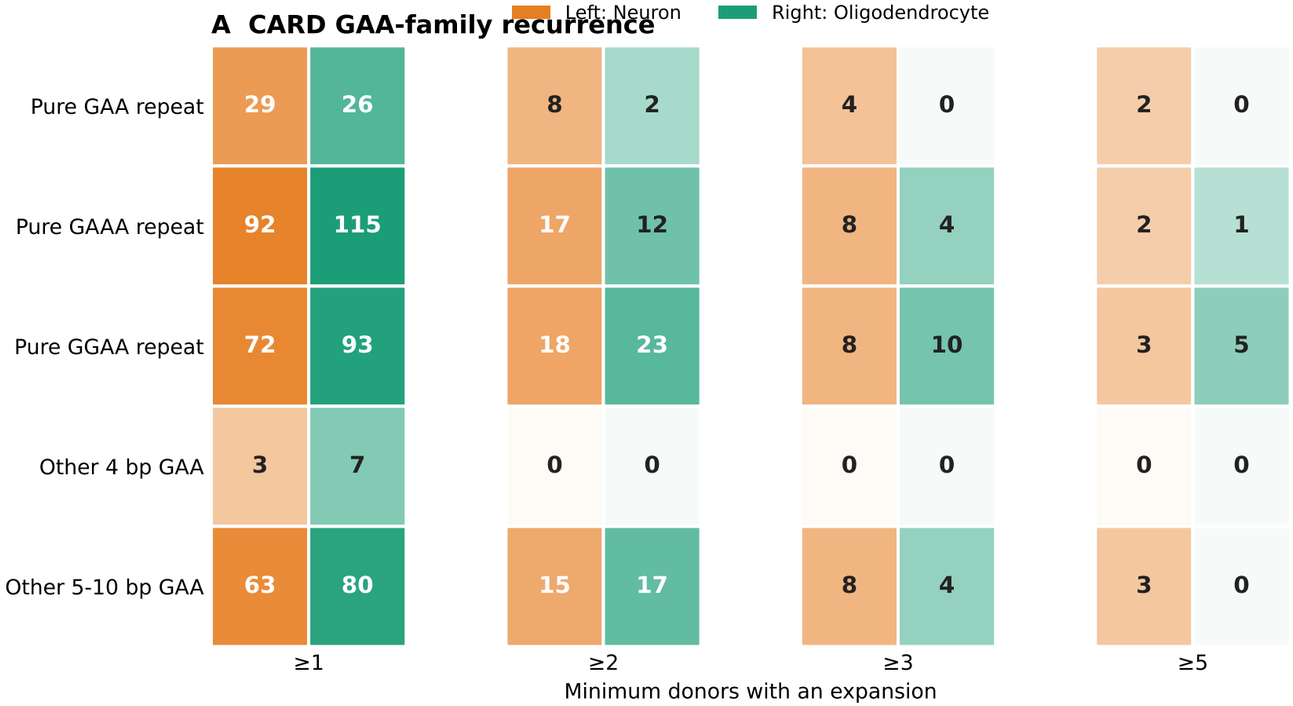
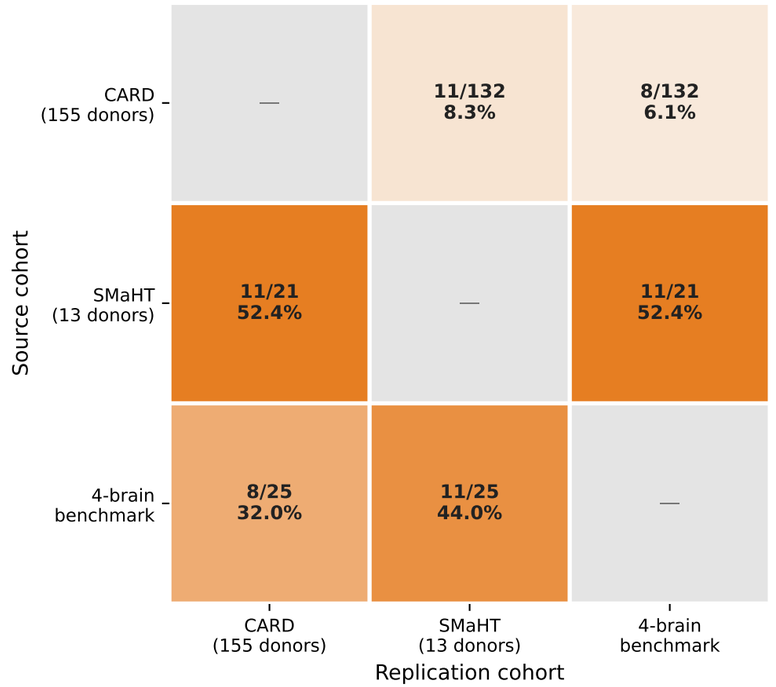
A CARD GAA-family recurrence

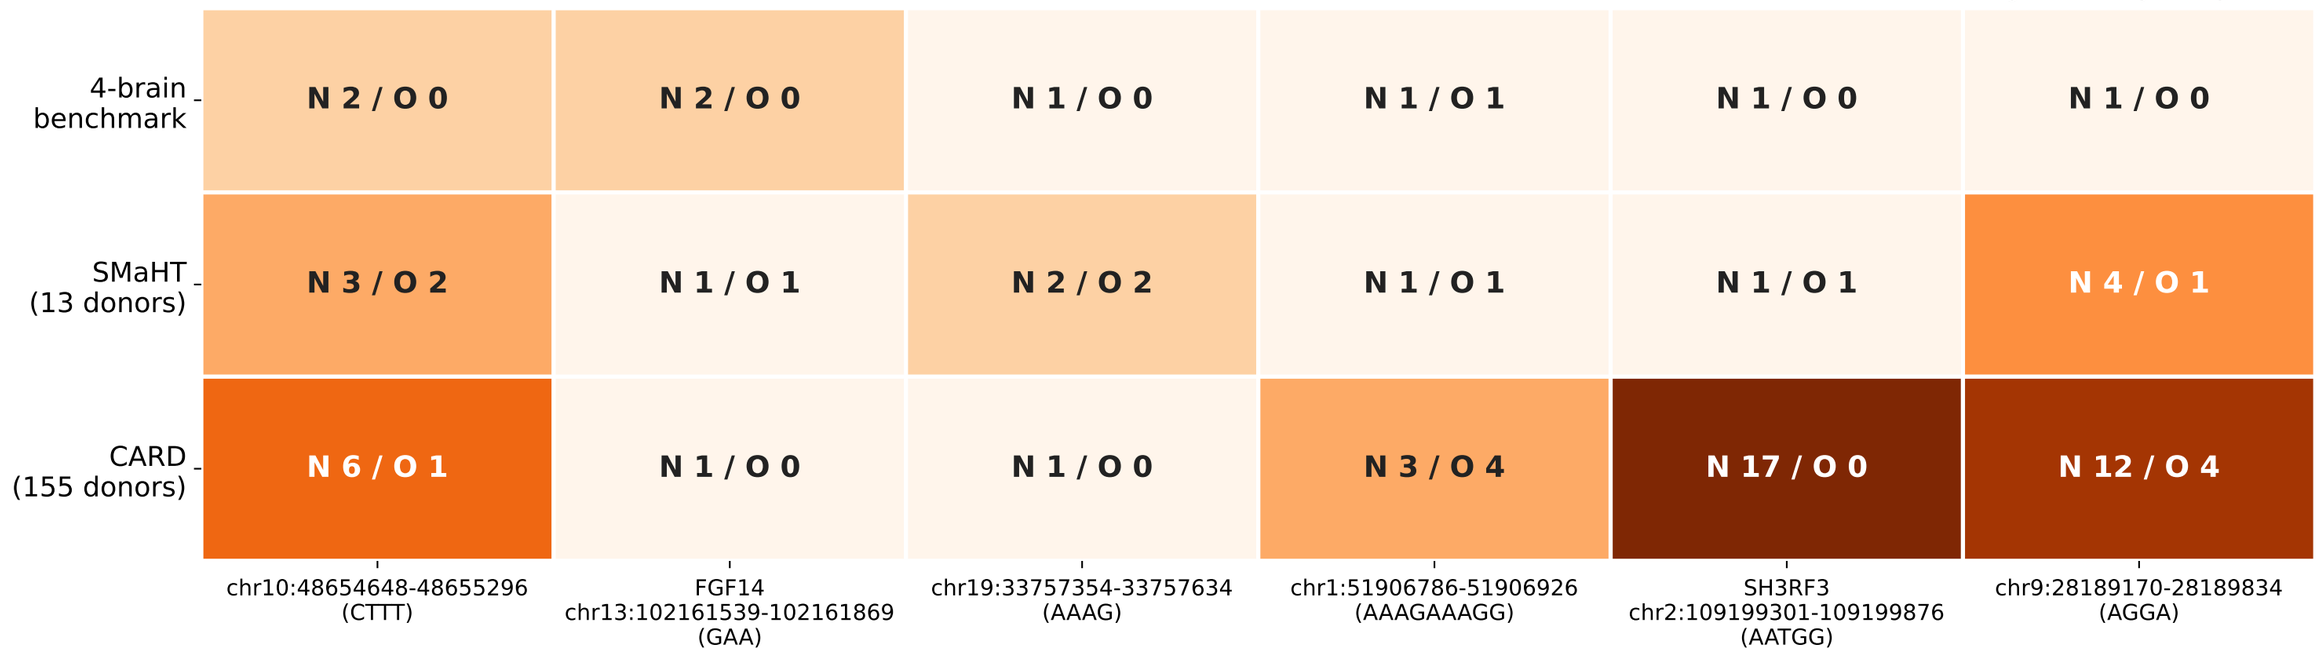


B Cross-cohort replication of GAA-element Neuron loci



C GAA-element Neuron loci found in all three cohorts

N/O = donors with Neuron/Oligodendrocyte expansion



Panel A: corrected Adotto v2 lite GAA-element loci (motif ≤10 bp); a locus may be counted in both cell types. Panels B–C: exact GRCh38 coordinates and expansion ≥100 bp; source-normalized percentages. An absent call is not interpreted as confirmed absence.
